

“One of the biggest surprises was when we got the Apple approval for twelve-thousand-five-hundred. The guy that approved me said that limit is much higher than they normally give, so he said we must’ve done something right.”

Christine Farrell
LaGrange, IN

Business credit is actually working pretty well for us. It’s given us the opportunity to open up other doors to get access to credit repair clients and that’s really increased our revenue exponentially. I think it’s a great idea, a great concept that Mike Citron and staff have put together. It’s very turn-key and very easy and simple to understand. They are constantly innovating the business package, the business credit package, the business financing package.

Dominick Burke
New York NY

I was looking for a fast way to get money to grow my consumer business. After failing to get approved for loans with several banks, I discovered Credit Suite. After getting initial vendor accounts, I continued applying and getting all types of credit, and **now have over 100 business credit cards in my wallets, totaling over \$1,000,000 in available credit.** I have fleet, bank credit cards & have secured loans over \$100,000 using this system.

5 Steps to Success for Business Credit

1. Business Set-up
credibility check
credit reports check
2. Get vendor credit
3. Get revolving credit
4. Get cash cards
5. Get Capital funding

Business Credit...

What is it? Why do you need it?

Business credit allows you to establish credit **separate** from your personal credit. Your business trades are reported to Dun & Brad Street and a credit report is created giving lenders and suppliers information about your company.

All highly successful companies in the United States had and have to build business credit, Entrepreneurs who are able to establish, build and leverage business credit have greater access to adequate cash flow. They are able to manage goals and ultimately create growth for their companies.
